

Notice No.	KC17-00	Notice Date	2017.12.00	
Contract Title	Groundwater Monitoring in Barakah NPP in 2018			
Contract Overview	The objective of the service is to perform a groundwater data collection and validation according to US NRC RG 1.132 in Barakah NPP Site and to repair the groundwater monitoring wells to secure the quality of the groundwater data.			
Estimated Value	AED 184,968.8 (US\$ 50,358)	Type of Contract	Sole Source Contract	
Reason(s) for the Sole Sourcing	<p>The main concerns for this service at the moment are i) possibility for the acquisition of CICPA Pass to enter the Barakah site, ii) meeting quality and HSE requirement, iii) consistency of groundwater monitoring.</p> <p>Geoscience Testing Laboratory (GTL) is one of the local specialty companies for the geotechnical investigation and has many experiences of geotechnical investigation.</p> <p>GTL can get the security pass to access to the site, and already have a qualification documents for quality requirements and HSE activities. In addition, GTL can maintain the consistency with previous groundwater monitoring.</p> <p>Based on the review of technical capability and expertise, GTL is considered as a proper organization to perform this task.</p>
