GENERAL INFORMATION

A. GENERAL INFORMATION OF THE SERVICES

A. GENERAL INFORMATION OF THE SERVICES

During to the decommissioning of Pressurized heavy water reactor, large amount of radioactive waste is generated. Most of the radioactive waste generated by decommissioning is metal and it is necessary to install the Induction Melting System which minimizes the final disposal volume of metal for economic benefit. Since the Induction Melting System consists of many equipment with a large-scale, it is required to set up the layout of the radioactive waste treatment facility to construct the metal melting system.

Therefore, the purpose of technical consultation is to perform technical support to prepare a purchase specification of the Induction Melting System and to develop general arrangement including equipment layout for the radioactive waste treatment facility from experienced consultant.

Additionally, deliverables from technical consultation might be shared with Korea Hydro & Nuclear Power Co., Ltd. (KHNP) according to the terms and condition of the prime contract.
